

Public Notice

The Town of Ridgeland Water Department will be flushing the water system from April 1, 2022 through April 29, 2022. The S.C. Department of Health and Environmental Control requires that the Town flush the water system at least once a year.

Flushing consists of opening hydrants and allowing them to flow freely. It is possible that following the flushing your water may appear discolored. This is normal and can easily be corrected by letting your water run for a few minutes. We especially urge you to check your water before washing laundry.

If you have any questions please call Town Hall at 726-7501.
